What's the Problem?

- Energy is lost due to inefficiencies during AC/DC conversion
 - Nationwide, utility companies lose about 5-7% of power during delivery through transmission lines and distribution systems
- Energy Lost = Money Lost
 - The 5-7% energy lost adds up to a loss of about \$6 billion
- Societal pressure to become more eco-friendly and reduce emissions

The Technology

- AC / DC Conversion is essential to power modern technology
- In the conversion, residual ripple voltage remains that goes unused or is converted to heat
- Problem for grid operators using high voltage direct current lines

The Technology

- Dr. Jaber's "Systems, methods, and devices for simultaneous wireless and wired power transfer"
- Allows the use of ripple voltages present from power conversion to charge a battery and power additional devices
- \$120 cost saving / year per 120v device

The Solution

Technology is licensed from the
University of Alabama

Our company consults with the
client and creates an
implementation of the technology
to meet their needs

Client experiences cost savings
and gets closer to meeting
environmental and regulatory
goals

Existing Solutions

SMART GRID
TECHNOLOGY

ENERGY DEMAND
RESPONSE
PROGRAMS

ENERGY STORAGE
SYSTEMS

Value

**Reduces power use, which
reduces emissions in
power generation
and benefits the environment**

**Reduces total cost of
ownership
for consumer electronics**

**Expertise with how to
implement technology in a
variety of applications**

**Custom circuit design and
integration**

Potential Markets

Electricity Transmission

- Valued at \$317.89 billion in 2022
- Projected to grow to \$429.43 billion by 2030
- CAGR of 3.9%

Key Companies:

- Duke Energy Corporation
- National Grid PLC (UK)
- NextEra Energy Inc
- American Electrical Power Company

HVDC Transmission

- Valued at \$10.6 billion in 2022
- Projected to grow to \$23.7 billion by 2032
- CAGR of 8.4%

Key Companies:

- ABB LTD
- General Electric
- Mitsubishi Electric Corporation

Other Potential Markets

EV Chargers

- Global market size of \$7.2 billion in 2022
- Expected to reach \$91.2 billion by 2032
- CAGR of 29.3%

Key Companies:

- Chargemaster
- Chargepoint, Inc
- Chroma ATE, Inc
- Delphi Technologies

USB Chargers

- Valued at \$25.23 billion in 2021
- Expected to reach \$44.85 billion by 2030
- CAGR of 6.6%

Key Companies:

- Baccus Global LLC
- Eaton
- Cyber power Systems, Inc
- MIZCO International, Inc

Customer Segments

Power transmission
and power delivery
teams at utility companies

Product development teams and
electrical engineers at power
supply, UPS
& power station manufacturers

Product development teams and
engineers at EV manufacturers

Future Plans

1

Continue customer discovery and nail down best places within identified customer segments to implement technology

2

Get funded

3

Work with technology inventor to create MVP based on problem-solution fit
